

# SAEY

## STOVES

# Lifelong delight

A SAEY is for life. So, rest assured, and put your trust in **many years' craftsmanship**. Enjoy it to the full and discover how heart-warming a SAEY stove can be. Hour after hour. Year after year.

A SAEY stove will fit you like a glove. Because during kindling, burning as well as maintenance, SAEY only has **your comfort in mind**. So you can relax without a care while viewing the playful flames. What's more, SAEY stoves have an exceptionally efficient combustion. This way, you obtain the highest performance with the least amount of fuel. That's not only a good thing for the environment, but also for your wallet.

TECHNICAL CHARACTERISTICS

# Top-flight rustic

## SAEY 194

### *Tradition and innovation united*

The rustic SAEY 194 lets your wood produce a cracking performance. Smart technologies ensure an optimal combustion as well as the highest efficiency. For one thing, via the back side, the SAEY 194 adds a warm air stream to the hot flue gases. This process, called **post-combustion**, is responsible for as much as 80 percent performance. Furthermore, SAEY's unique **SNORKEL Technology** makes sure you can enjoy your fire in a healthy and safe environment. By means of the handy side filling door, you can quickly and easily load logs.

SAEY 194

# The warmth of generations

## SAEY 92/94

SAEY 92

### *Cast for life*

The SAEY 92 and SAEY 94 are success stories. Because for generations on end, families have put their confidence in the warmth and solidity of this cast iron giant. Cast in the most **durable materials** and finished up to the finest detail, the SAEY 92/94 is indestructible and unbeatable in its class. By all means a stove for life.

## *Long-lasting delight*

The SAEY 92/94 allows you to enjoy your fire exactly as long as you want. You can light the stove in no time. But also while operating, you don't need to worry. You want your stove to operate for a long time? No problem. Thanks to the **convenient, large combustion chamber**, you can easily load big logs. This way, you and your stove are settled for hours on end.

477.0220.000

Never thought that a **compact stove** like this could deliver this heat? Then amaze yourself at the SAEY 200/200+. Because this small, but very solid wood-burning stove is a **grand performer**. The SAEY 200/200+ is made of the most qualitative cast iron and is a master in retaining and distributing the heat into the living area. The SAEY 200+ has an **ashpan**, while the SAEY 200 uses **refractory stone**.

SCOPE

# The **virtue** of **simplicity**

## SCOPE / SCOPE XL

SCOPE XL

### *Easy, as it should be*

The Scope's simplicity is what catches the eye. Not only the design is **taut and contemporary**. The simplicity also lies in the usage and maintenance. It is possible for example to **load wood via the front door** without any smoke nuisance, thanks to a specially designed smoke flap. However, loading logs is also possible via the discretely concealed side door. In addition, the stove can handle **big logs**, so you need to supply less frequently.

## *Heating safely and healthily*

The Scope is equipped with SAEY's unique **SNORKEL Technology**. This makes sure you can enjoy your fire in a healthy and safe environment. SNORKEL Technology rules out CO poisoning. In addition, stoves with SAEY's SNORKEL technology do not drain off hot air from your living area in order to keep the appliance going. As a result, they are very economical and efficient.

SCOPE /SCOPE XL

## *A Scope fitting your taste*

The Scope stoves are completely made of cast iron and offer **ample choice**. They are available in anthracite, grey or two-coloured (anthracite and grey) paint. Both a high (81 cm) and a low (70 cm) model exist.

ePURE IV

# Cut out for **today's** home

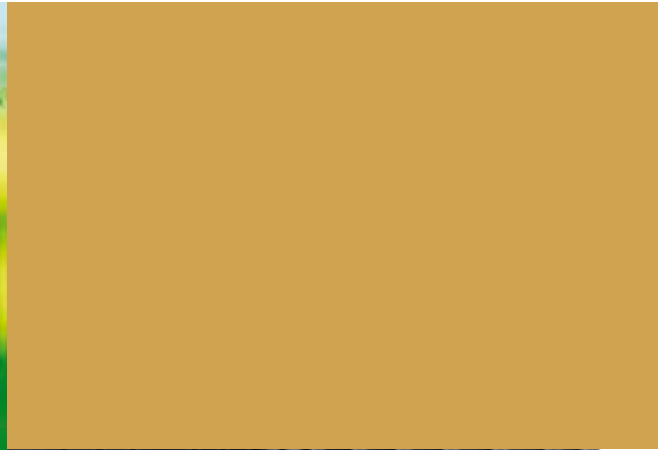

## ePURE

ePURE V

*The heating par  
excellence for the  
insulated home*

Thanks to its low power and high performance, the ePure is the stove par excellence for today's well insulated home. In addition, the ePure is equipped with SAEY's unique **SNORKEL Technology**. This makes sure you can keep a fire healthily and safely. Stoves with SNORKEL technology rule out any possible backwash of flue gases and resulting CO poisoning.

## *Simple control, simple maintenance*

The ePure makes control as easy as possible. It is possible for example to **load wood via the front door**, thanks to a specially designed smoke flap, without any possible smoke nuisance. However, loading logs is also possible via the discretely concealed side door.

LINUS

# Contemporarily different

LINUS

## LINUS

### *A treat for the eye*

The Linus, that's how you really like to heat your living area today. Its **contemporary design** and typical cylindrical shape allow you to easily fit this stove into your interior, even in a corner. Thanks to its **panoramic window**, the Linus allows you to optimally enjoy a splendid view on the flames.

## *Lasting warmth*

The Linus perfectly retains its heat, so you can enjoy your fire for a long time. This results from the **high-grade material** which this stove is made of. But there's more. The Linus operates by means of **post-combustion**. Via the back side, hot air is added to the flue gases, which results in a more complete and substantial combustion. This in turn results in a lower emission of toxic substances and in a higher performance.

## *Heating safely and healthily*

The Linus is equipped with SAEY's unique **SNORKEL Technology**. This makes sure you can enjoy your fire in a healthy and safe environment. Adding wood to a Linus stove is also very safe, because with the **self-closing door** and the **ergonomic handle**, your hands are hardly exposed to the blazing heat. And what about the environment? With an 84 percent performance rate and an extremely low emission of toxic substances, the Linus more than amply meets the stringent DIN+ standard.

ALTUM

# A **unique** source of **conviviality**

## ALTUM

### *Heating, but not as you know it*

What makes the Altum so unique? Is it the **slim line**? Its **panoramic window** which offers you a fantastic view on the flames? The ease of use while lighting this stove? Or rather its unique way of loading wood, which implies **placing logs vertically** in the combustion chamber? Well, all that, really. But also a lot more. Because the Altum easily combines all these innovative features with the traditional performance which can be expected from a SAEY stove. The **80 percent performance** for example. The exceptionally **low emission** of CO and fine dust. And last but not least, SAEY's proven **SNORKEL Technology**, which ensures a healthy and safe environment.

ALTUM

477.5306.013

ACCENT

# Showpiece and top performer

**ACCENT**

477.5407.220

## ACCENT

### *Luxuriant warmth*

Is it a stove? Is it an inset fire? Fact is, the Accent is quite an eye-catcher. Because with its high stoking area and wide glass surface, this trendy firebox offers **an incomparable view on the flames**. You can move your Accent anywhere, literally. The firebox can be positioned on the left, the right or centrally on the included piece of furniture, which offers ample room for your firewood. Furthermore, this wood-burning stove owes its character to the use of **luxurious materials**, such as soapstone, rust-free steel and glass. And performance? That's OK too, because with an efficiency rate of 87 percent, the Accent is the better of any competition.

SAEY 92 WOOD-COAL

# The **fire** we know so well

## SAEY 92/94 WOOD-COAL

SAEY 94 WOOD-COAL

### *Long and worry-free delight*

The SAEY 92 and SAEY 94 are welcome guests in many households. This wood/coal-burning stove lets you enjoy its luxuriant warmth for a long time and without any worries. The **big feed hopper** of the SAEY 92/94 allows you to load large amounts of coal at once, so you needn't worry for a very long time. The shaking grid and wide ashpan are very easy to handle too.

## *Quickly from coal to wood*

With the SAEY 92/94, you choose **the fuel you want**. Converting your coal-fired stove to a wood-burning stove? No problem. You only need to remove the feed hopper and install the optional wood grid. And that's that.

SCOPE

# Contemporary classic

SCOPE  
WOOD-COAL

## *Surprisingly flexible*

Yes, the Scope is a wood/coal stove. But not as you know it. Because of both its extra **upper and rear connections**, this flexible stove can be integrated into practically any interior. But what really makes this Scope so unique is its innovative **SNORKEL Technology**. This makes sure that you can enjoy your fire in a healthy and safe environment, without any risk of CO poisoning.

SCOPE grey

478.0700.010

SCOPE anthracite

478.0700.000

# Durable and full of possibilities

## *Lasting warmth*

SAEY equals **quality**. That's why you can enjoy your SAEY stove for a lifetime. The high-grade cast iron which our stoves are made of, will perfectly retain the heat, so you can enjoy yourself for hours on end, even long after the fire has gone out.

## *Designed for your comfort*

A SAEY stove is very **easy to use**. You kindle your stove in no time and you very easily control the intensity of the flames the way you want. Our stoves are also often fitted with a convenient side filling door and a big combustion chamber, so loading logs becomes effortless. A lot of our stove types have an upper as well as a rear connection. This way, you can easily integrate your SAEY stove into your interior.

## *A permanent view on the flames*

The SAEY **airwash system** permanently keeps the fire window clean. Airwash technology drives a constant airflow along the window, making sure that the flames do not blacken the window surface. This way, you can enjoy your view on the flames hour after hour and day after day.

## *Mindful of your well-being*

For a healthy, safe and economical combustion, SAEY developed the **SNORKEL Technology**. **Healthy**, because this technology takes all required oxygen for the combustion process from outside and not from your living area. And that's a must for today's increasingly better insulated homes. **Safe**, because SNORKEL Technology rules out any possible backwash of flue gases and resulting CO poisoning.

## *Economical and environment-friendly*

A SAEY stove ensures the most economical combustion and the highest heat performance. Good for your wallet, but also for the environment. Because of the excellent combustion, **less toxic substances** are being released. In addition, stoves with SAEY's SNORKEL Technology do not drain off hot air from your living area in order to keep the appliance going.
